Attn: Steve Flecker

Dear Steve:

I am writing to thank you for introducing me to the Enviro Save products. As you may remember, I initially put your product in my Ford Excursion. After following carefully the recommended protocol for the treatment, I noticed an immediate improvement in my gas mileage of three miles per gallon. I also noticed an increase in power. The engine just seems to run more smoothly now. I was so impressed with your product that I quickly utilized the one time treatment on my Honda Accord as well as my ski boat. With the boat, in particular, I have noticed a great increase in horsepower. I am able to quickly and easily pull skiers out of the water, which makes boating much more pleasurable for our family.

Steve, when you introduced me to Enviro Save I could tell immediately that you had done your research and had your facts in order. That was the main reason that I decided to give Enviro Save a try and I am glad I did. My sons are constantly trying to educate me about the dangers our environment faces as a result of our dependence on oil and I am constantly trying to teach them the value of a dollar. With Enviro Save, everybody's happy! Thanks again, Steve.

Sincerely,

Joe Brown
