Dear David,

Re: Envirosave Products

As you are aware, since February 2005, we began the process of installing Envirosave kits on our 128-vehicle fleet of E450 paratransit buses and Crown Victoria sedans at our Ottawa location. We were looking for a product that could – if possible – extend the life of the engines and in addition, improve fuel economy while at the same time be quick and easy to install.

Our April results are in and from March to April of this year, our fuel consumption on a per-mile basis has dropped by approximately 10%, and we have had no engine or transmission failures, until today. We have just been advised by our Maintenance Supervisor that one engine and two transmissions have failed within the last week...on vehicles that we had not yet treated with the Envirosave kits! Had we started treating our vehicles sooner, these costly repairs may have been avoided.

Many thanks,

Roch Cousineau
Ottawa Branch Manager
